

BRITISH  
ENGINEERING  
SERVICES

## WHY CHOOSE US?

SINCE 1859

**British Engineering Services** can trace its roots back to 1859 and, until recently, was part of RSA Insurance Group plc. In 2015 we once again became the UK's largest independent and British owned Engineering Testing, Inspection & Certification company. Private equity backed, we are now making significant investment in all areas of our business to enable us to deliver the highest levels of service to both brokers and customers.

Our aims are to:

- Modernise and improve our customer offering
- Provide **THE** industry benchmark for quality, safety and innovation
- Work in valued partnership with brokers and their clients.

### Our Services

We provide Engineering Testing, Inspection & Certification Services that help to reduce risk for your clients by achieving statutory compliance within various regulations for lifting, pressure, machinery and other types of plant and work equipment.

We have an appetite to provide a reliable and quality service to your entire client base, in whatever industry they operate, from providing bespoke and complex solutions for your largest and most prestigious clients, through to your SME segment. Working with us, you can expect you clients' inspections to be completed on time, every time.

Today, we have a growing workforce of over 450 highly trained and qualified Engineer Surveyors and Consultant Engineers with ongoing recruitment plans to ensure the continued growth of our business.

### Facts and Figures

- 2.8 million inspections carried out last year in the UK, across 62,000 sites
- Over 27,000 serious defects discovered last year - ***is that your last Property, BI or Liability claim?***
- Over 30,000 customers across all industries.

### Commission

All new business with you can be transacted at either a default of 15% or 20% commission and is subject to individual negotiation if a higher level is required.

### Open Market Business

We have a bespoke set of solutions that will provide real value to your clients who adopt an approach of managing risk effectively and may have more complex requirements.

This may mean utilising our free interactive customer-facing E-Report system, with real time inspection reporting, MI and download functions. Or by using the services of one of our experienced team of Key Account Managers whose primary role is to be the main contact for all aspects of your clients' inspection contract. We can provide Key Performance Indicator packs, Plant identification Surveys and Defect Trend Analysis Reports, as well as bespoke training and innovative ways to reduce risk, such as the use of Thermographic Risk Assessments to identify electrical hotspots and reduce insurance spend.

Whatever the need, simple or complex, we have a solution.
